

TEGRABOND®

Tegrabond® water activated tape systems provide the ultimate tamper evident, integrated tape sealing security solution.

Market-leading Tegrabond® water activated tapes create an effective 'first line of defence' against potential pilferage and contamination.

Below is just a selection of water activated tape dispensers from the Xtegra® Tegrabond® range. To see the full range please visit: www.xtegra.eu.com

BP555
Electronic Water Activated Taper Dispenser

The BP555 Electronic Water Activated Taper Dispenser offers the most options and the highest level of automation currently available from Xtegra® Tegrabond®.

- Features include:
- > Largest tape capacity in the industry
 - > Extra heavy duty, self-lubricating blade
 - > Ergonomic design
 - > Steel frame construction covered with ABS plastic
 - > Automatic Function
 - > Programmable Keys
 - > 20% increase in motor power
 - > Extra long detachable cord

BP500
Electronic Water Activated Taper Dispenser

The user-friendly BP500 electronic water-activated tape dispenser from Xtegra® Tegrabond® is suitable for reinforced and non-reinforced water activated tape, either as 'gummed side in' or 'gummed side out'.

- Features include:
- > Adjustable top heater
 - > Steel frame construction covered with ABS plastic
 - > Blade lifter
 - > Large capacity water bottle

BP333
Manual Water Activated Taper Dispenser

The rugged BP333 from Xtegra® Tegrabond® is the world's top-selling manually operated, dispenser for water activated tape in the industry.

- Feature includes:
- > Superior Mechanics and Guillotine Blade
 - > Rugged Engineering
 - > Fast Length Selection

Xtegra® Tegrabond® Water Activated Tapes

All Xtegra® Tegrabond® water activated tapes are manufactured to the highest standards, offering optimum sealing performance.

For more information on the Xtegra® Tegrabond® range of water activated tapes go to www.xtegra.eu.com

Consider the advantages of Tegrabond® Water Activated Tapes...

1

An integral Closure

The adhesives in Tegrabond® water activated tape penetrate into the fibres of the carton, creating a total bond. As the tape becomes an integral part of the carton this adds considerable strength to the closure as opposed to the purely top-surface bond of standard packaging tape adhesive. Plastic tape does not provide the same level of security as Tegrabond® water activated tape.

2

Tamper Evidence

Tegrabond® water activated tape cannot be removed from the carton without leaving traces of damage, unlike standard packaging tapes which can be removed with no visible trace. Hence Tegrabond® water activated tape offers clearly visible proof of a package's seal being tampered with. Specialist Tegrabond® tamper-evident reinforced tape is also available for increased security protection.

3

100% Recyclability

Tegrabond® water activated tape is made from renewable natural resources which makes recycling easier. Packaging research associations have all given Tegrabond® water activated tape recyclability accreditation, making it the environmentally-friendly choice for the packaging professional.

4

Temperature Tolerant

Even with extreme variations of temperature and humidity, Tegrabond® water activated tape's seal retains its strength and remains highly resistant to ageing, making it the ideal solution for long term storage.

5

Improved Packaging Presentation

Tegrabond® water activated tape also out-performs plastic tape on presentation, adhering flat against the carton and blending with the character of the cardboard, in contrast with the shiny, rippled seal often seen with plastic tape. Tegrabond® water activated tape also shows the customer that you care for the environment.

6

Cost Savings

Tegrabond® water activated tape is a cost effective way of carton sealing and can be cheaper per linear metre than any reasonable grade packaging tape. Only one strip of Tegrabond® water activated tape is generally required where several strips of cheap plastic tape would be otherwise needed.

7

Increased Productivity and Reduced Operator Fatigue

When applying Tegrabond® water activated tape with our professional range of Tegrabond® taping machines, we have proven test records of increased productivity and a reduction in operator fatigue compared with the results of using a combination of plastic tape and standard tape guns.
